

Gabriel de Bure

Apprentice software developer

Toulouse, France · Low-level & full-stack development

debure.gabriel@gmail.com gabrieldebure.com github.com/EICabrii [LinkedIn](#)

Software developer at Airbus, previously C++ and 3D engineering at Akkodis. Solo creator of MyTuums.

EXPERIENCE

Airbus Aircraft

Sep. 2026 – Present

Apprentice software developer · Toulouse

- Software development on the Flight Physics Capabilities team.

Akkodis · 3D Juump

Sep. 2025 – Sep. 2026

Apprentice software developer · Blagnac

- Developed C++ backend functionality for 3DJuump Infinite and a Yuzu clearance tool that finds distances between large part sets in seconds.
- Worked on an embedded AI agent to automate repetitive web-app workflows.

Akkodis · 3D Juump

Mar. 2025 – Jul. 2025

Software development intern · Toulouse

- C++ software development for 3DJuump Infinite.

SELECTED PROJECT

MyTuums

Independent solo project

Build and maintain a bilingual social platform end to end: interface, typed API, authentication, database, and deployment.

- Personalized feeds, game discovery, posts, media uploads, and moderation.
- OAuth, 2FA, passkeys; Vitest and Playwright testing with CI checks.

React · TypeScript · oRPC · Drizzle · Cloudflare Workers / D1 / R2
